

What is the deepest trench in the Caribbean Sea? The Puerto Rico Trench is located in the northern part of the Caribbean Sea, in the Atlantic Ocean. It is a deep-sea trench that is approximately 2,867 meters (9,423 feet) deep. It is located in a convergent position between the Lesser Antilles subduction zone and the South Atlantic major transform zone. The trench is a plate boundary, which separates the Caribbean Plate from the North Atlantic Plate. The trench is located between Cuba and Hispaniola, and it extends from the Cayman Islands to the central part of Central America. The trench is 800 kilometers (497 miles) long and has a maximum depth of 8,377 meters (27,480 feet) or 5.1 miles. The deepest part of the trench is in the Brownson Deep, which is 8,377 meters (27,480 feet) deep. The trench is the deepest in the Atlantic Ocean and the second deepest in the world. On
