

the same time, the *Journal of the American Medical Association* (JAMA) has been publishing a series of articles on the same topic.

The first article in the series, by Dr. J. H. Green, Jr., of the University of California, San Francisco, is entitled "The Role of the Physician in the Control of the Environment."

Dr. Green's article is a review of the work of the American Medical Association (AMA) in the field of environmental health.

He points out that the AMA has been active in the field of environmental health since the 1930s, when it first began to publish a series of articles on the topic.
